Robert Gardiner is Again U.F.A. Choice for Acadia

Robert Gardiner was the unanimous choice of the Acadia Federal Constituency U.F.A. Association at the nominating convention of that body, held in Hanna last Saturday. The date set for the federal election is Tuesday, September 14.

Mayor (Dr.) G. H. Wade of Hanna Unanimous Conservative Choice

At the conservative nominating convention held in Hanna last week, Mayor (Dr.) G. H. Wade, was unanimously chosen as the standard bearer of the party to oppose Robert Gardiner in the federal constituency of Acadia.

Farewell to Mrs. John Naismith

About thirty five ladies, representing the Women's Institute the Ladies Aid, the Sunday School, the C. G. I. T. and the Eastern Star, met at the home of Mrs. J. P. Kerr, last Friday evening in a farewell social to Mrs. John Naismith. After a couple of hours pleasantly spent the guests sat down to a most sumptuous repast, following which Mrs. Naismith was presented with a silver comport and pair of candle sticks.

Mrs. Naismith has always been an ardent worker in all social activities of the community and will be keenly missed in these circles. Her departure for Craigville this week is a matter of regret to her many friends.

Lees, 2nd Mrs. T. C. Hess.
Sec 4, 1926 heifer calf. 1st Mrs. C. Ostrander, 2nd D. Warwick.

Class 16—Beef

Sec 1, Cow born in 1923 or prior. 1st E. H. Church, 2nd J. D. Armitstead.

Sec 2, 1926 calf. 1st J. D. Armitstead.

Sec 3, 1924 heifer. 1st E. H. Church.

Sec 4, 1925 heifer. 1st E. H. Church, 2nd J. D. Armitstead.

Sec 5, 1924 steer. 1st E. H. Church.

SHEEP

Class 17—Grade Sheep
Sec 1, Ewe, any age. 1st Thos. Abbott, 2nd G. S. Peck.

Sec 2, Ewe lamb. 1st Thos. Abbott, 2nd G. S. Peck.

Sec 3, Shearling. 1st G. S. Peck, 2nd Thos. Abbott.

Class 18—Registered Sh. opshires
Sec 1, Ram, 2 years or over. 1st Thos. Abbott.

Class 19—Registered Orforda
Sec 1, Ram, 2 years or over. 1st G. S. Peck.

Sec 4, Ewe. 1st and 2nd G. S. Peck.

Sec 5, Ewe shearling. 1st G. S. Peck.

Sec 6, Ewe lamb. 1st G. S. Peck.

Special, donated by Thos. Thompson, for best pen of four sheep. 1st H. G. Peck, 2nd Tom Abbott.

SWINE

Class 21—Yorkshire
Sec 2, Brood Sow, over 1 year 1st G. S. Peck.

Sec 3, Sow 6 months or under 1st G. S. Peck, 2nd G. S. Peck.

SPECIAL PRIZES

DOMINIONS AS INDEPENDENT AS MOTHER COUNTRY

London.—The Labor party last week held Right Hon. L. C. M. Amery, secretary of state for the dominions, answer a question regarding the constitutional difficulty in Canada to its satisfaction, and I feel that he expressed the attitude of every party on the issue. In this manner J. H. Thomas, Labor member for Derby, prefaced a speech with which he opened a debate on dominion colonial relations in the House of Commons. Mr. Thomas said he wished to avail himself of this opportunity because general elections were pending in Canada and he desired to make clear to the world what Great Britain meant by self-government and also to emphasize that whatever advice Governor-General Byng gave during the parliamentary crisis in Canada was given on his own responsibility. He declared the decision was given by the governor-general on the strength of the "best knowledge" he had had of the situation and stressed that there had been no interference from Downing Street.

The Labor member said that, "with more amusement than interest," he had read a suggestion in an American newspaper that, owing to the wicked attitude of the British Government, Canada should free herself from the tyranny of Downing Street. The paper had also suggested that Canada be handed over to the United States on the terms of the 1763 Great Britain's war debt to that country, and Mr. Thomas held this to show how some people did not attempt to understand the neutrality and meaning of the British Empire.

With reference to the imperial conference, which Premier Baldwin announced in the commons, was held on October 15, two weeks later than the date first set. Mr. Thomas expressed the hope that not only the representatives of governments, but also governments would be invited. Thus, he pointed out, party spirit should be eliminated and a greater continuity of policy would be secured.

Nothing in the nature of debate occurred on this part of Mr. Thomas' speech, but Lord Bessborough, secretary for the dominions, in the course of a general reply, in behalf of the government, emphasized that the dominions were just as independent as the Mother Country. The characters of their independence was the same as the British, only qualified by self-imposed responsibilities of mutual loyalty and co-operation.

Gives Reason For Coal Strike

England Returned Too Soon to Gold Standard Say Beaverbrook

London.—Lord Beaverbrook, minister for the White Star liner Mauretania for Canada via New York, in a long article printed on his signature in The Daily Express on the eve of his departure he declared the failure of the recent proposal for the purchase of the White Star line by the British shipping industries was due entirely to the British official policy of maintaining the gold standard. He intimated that the proposal to transfer £600,000 pounds from Britain to the U. S. for the purchase of this line was opposed by the British financial authorities on the ground that it would depress the value of the pound in New York and hamper the present exchange conditions. He also argued that the coal strike is a direct result of the too early return of the gold standard as this raised the cost of selling coal in foreign countries so that the cost of production at home had to be lowered in order to keep up the possibility of competition in the world market.

U. S. Starts Gold Movement

Premium On Canadian Dollar Makes Export Profit

New York.—A movement of gold from New York to Canada was started with a shipment of \$1,000,000 made by the J. Henry Schroder Banking Corporation to the Bank of Montreal. The shipment was said to represent purely an exchange transaction as the premium on Canadian dollars has risen to the point where the export of gold from this country is profitable. Canadian exchange is quoted at a premium of three sixteenths of one per cent., which is a shade above the gold shipping point.

The present strength in Canadian exchange is attributed directly to the heavy financing which has been done recently in the New York market in behalf of industries in Canada.

Loss In Florida Storms

Property Damage Is Estimated To Run Into Millions

Jacksonville, Fla.—Reports of damage from the storm had passed came in ascripried wire facilities were slowly restored. A report from Nassau via Miami fixed the damage there at \$50,000.

A message received by the Munson Line in New York from Nassau stated that the damage there at \$50,000.

Major damage was principally to the Avocado pear crop. Palm Beach's playground suffered heaviest damage in the loss of more than a score of yachts and small craft which went down when a pier gave way.

Daytona Beach experienced damage to light and power lines, disrupted telephone service, uprooted trees, washed out highways, wrecked beach concessions and damaged small pleasure craft. After a night without lights, the power service was restored.

A rum running vessel was reported ashore several miles north of Orlando.

The storm took only two lives as it passed up the Florida coast, but it caused property damage estimated in the millions by Palm Beach. Loss was estimated at \$100,000, and that of Stuart, Fla., at \$250,000 and Miami's at \$100,000.

In addition to damage to shipping, telegraphs and telephone wires and crops at scores of places.

Complaint Against New Settlement Act

Union Members in British House Say

London.—Complaints that the present settlement act is a failure, coupled with the suggestion that the sums assigned each year for the assistance of immigration should be carried forward annually for the same purpose and not restricted to the consolidated fund, which cannot further be drawn upon, were made in parliament by Unionist members from Lancashire and Cheshire. The complainants stated that the greater part of the £9,000,000 which has been provided by the settlement act during the last three years has not been spent and under the present regulations is now lawless available.

They also declared that the clause providing for Dominion contributions in acting as a check upon immigration because of the conditions imposed by the various Dominions. They suggested that a portion of the fund provided by the British Government should be utilized without reference to the Dominions' contribution overseas.

Asks Canada's Co-operation

British Government Asks Aid In "War"

On Run Runners

London.—Canada will be asked by the British Government to co-operate to the fullest extent in the fulfilment of the agreement of the British Empire and the United States to facilitate the suppression of run-running. As a result of the visit of General Amery, Canada is directly involved in the details of co-operation between Britain and American authorities in this connection have been arranged. Canada is not directly involved in the main part of the agreement which is directed toward the Bahamas from which a vast number of run-runners have been pouring into the United States. An effort will be made, however, to prevent the illegal use of the British flag by run-runners who are not on British registry, and it is believed that Canadian authorities will be able to help along the enforcement efforts in this direction.

French Kill Syrian Tribesmen

Many Prisoners Taken In Fighting

Beirut, Syria.—Several hundred tribesmen have been killed by the French and more than 200 prisoners taken in fighting around the oasis of Ghazat, according to a general staff communiqué.

The French statement charges that two aviators who were forced by engine trouble to land in the midst of their enemies were wounded and then fastened to their plane and burned.

Whittemore to Hang
Baltimore, Md.—Governor Albert C. Ritchie refused to commute to life imprisonment the death sentence of Richard E. Whittemore, gang leader and slayer of a Maryland postmaster. He will be hanged August 15.

Royal Tomb Violated

Orleans, France.—Phrases have violated the sanctity of the royal tomb at Cléry, carrying off precious golden and jeweled chalices, and reliquaries to the value of more than \$100,000.

Has Alayed Fears Of British Authorities

Cannot Contract Food and Mouth Diseases From Meat Says Doctor

The Hague, Holland.—There is no danger of foot and mouth disease being contracted through the use of the meat of animals affected by the disease and killed during the quarantine period, according to Dr. Laurens, director of the Institute of State Hygiene.

As a result of Dr. Laurens' experiments, Dr. Kan, minister of the interior and agriculture, asked the director of the Institute and Dr. Berg, director of veterinary service, to confer with the British authorities with a view to allaying the fears of the latter with regard to infections from animals affected by foot and mouth disease.

Wives Must Remain At Home

Australia Expects British Parliamentarians To Make Trip Alone

London.—Australia is set against wives. When the Australian cricket team sailed for Great Britain, the Australian cricket board of control put on the wives accompanying the members of the team.

And now the Australian branch of the Empire Parliamentary Association has advised British parliamentarians who are soon to visit Australia that they are not expected to be accompanied by their wives.

J. H. Thomas and several of the other members of parliament have refused to make the trip because their wives are barred.

SAYS NOTHING SUPPRESSED IN DUNCAN REPORT

Montreal.—The Montreal Star carries the following Ottawa special: "In the course of the discussion of the political news and in the newspapers as the Duncan report on investigations into the customs department and the conflicting allegations that are made, Inspector Walter Duncan, special investigating officer, was asked for a clarifying statement as to whether anything was suppressed and if so, what it was."

"It was stated," he said, "to make an investigation into the administration of the customs service in Montreal and that district, and I have selected papers and documents in the office of J. E. A. Hession, chief preventive officer of the district, and summoned and examined on oath officers who, I thought, were in position to throw light on the question."

The evidence was taken and transcripts submitted first an interim report and afterwards a fuller report. Both of these reports were produced before the committee of the house that investigated the customs department, and were read into the record of the house. Nothing in the report was suppressed or deleted, but the evidence, comprising 219 pages, upon which the reports were based, was not read into the record, although it was tabled in the house. The exhibit was also tabled.

"What I did not produce before the committee, and what was not published was a memorandum book to a certain woman. The notes in the book were in shorthand. I had them condensed."

More Highlanders for Canada

London, Ont.—The Canadian Biscuit Company announces the outright purchase of the D. S. Perrin Company, Limited, manufacturers of biscuits and confectionery.

Looking group who arrived recently on the C.P.N. steamer Metagama. Men in the prime of life, pretty strong, young fellows in the bushy and uniform of a famous Highland regiment and others attired in kilts and all the paraphernalia and bagpipes. It was a very best class of settlers that this country can get—and the more we get of them the better for all of us.

GOVERNMENT TO DECLARE WAR ON BOOTLEGGERS

Toronto.—The Dominion Government has entered the "fight to a finish" which has been declared against bootleggers following the deaths of 18 persons in Western Ontario presumably as the result of the flooding of that area with poisonous alcohol.

The cooperation of the Federal authorities was promised in a telegram being sent here from the deputy minister of customs.

Hon. W. H. Price, acting attorney-general for Ontario and leader in the war against the illicit whiskey traffic, declared a special officer of the Royal Canadian Mounted Police was being sent here to consult with provincial officers in an effort to aid in the discovery of the point of origin of the death-dealing fluid.

It is indicated that the assistance of the Dominion Government is also to be sought in an effort to prevent recurrence of the unprecedented liquor traffic. As a result of the investigations of the past few days, it was unofficially stated that the Ontario Government would ask that federal legislation be passed compelling the registration of unstarred foreigners.

It was intimated that the probe has shown the liquor industry to be almost entirely in the hands of foreigners.

Philippines Import Wheat Flour

Bread Is Taking Place Of Rice As Food

Manila, P.I.—Consumption of wheat flour in the Philippines has increased in the last few years. Figures of the bureau of commerce and industry show that although rice is the staple food the Philippines are using bread as a supplementary food generally and in some cases as their principal article of diet. Wheat importations last year were \$600,000 as compared with \$2,000,000 in 1921. Four-fifths came from the United States.

New Industry For Alaska

Department of Agriculture Trying To Raise Sugar Beets

ANCHORAGE, Alaska.—An experiment in raising sugar beets will be made in Alaska.

The department of agriculture and the Alaska railroad will cooperate in the effort. The experiment will be made in the Metanah and Tanana valleys north of here. Cost of production and quality of product will largely determine the future of the venture.

Mine Trouble In Cape Breton

Glace Bay, N.S.—The trouble at the collieries as a result of the United Mineworkers' members refusal to work with members of the Cape Breton Union is spreading. In addition to No. 16, which has been tied up since Monday night, the Florence Colliery at Glace Bay is closed down and the princess is working with reduced force. It is feared that the struggle will become general.

Buy Biscuit Plant

London, Ont.—The Canadian Biscuit Company announces the outright purchase of the D. S. Perrin Company, Limited, manufacturers of biscuits and confectionery.

Modified Services, Religious Services in Mexico

Mexico City.—The Archbishopric issued a statement declaring that the withholding of the priests from the churches on August 1, as announced in the recent pastoral letter, does not mean complete suspension of religious services.

The services suspended will be holy communion, confirmation, confession, consecration and some sacraments which require the intervention of priests. Services which can be continued without the intervention of priests are modified masses, marriages and baptisms.

It is also announced by the archbishopric that during the cessation of the priests' activities a sincere act of repentance on the part of a Mexican Catholic will be considered equivalent to the confession necessary for death and marriage sacraments.

Re-Draft Petroleum Laws

Edmonton.—Revised rules and regulations in respect to oil and gas leases in all parts of the province have been prepared by the Alberta Government but will not be put into force for the time being.

The re-drafting of the petroleum laws in this regard was undertaken some months ago when the prospect for Alberta's entering into a lease with the natural resources were bright. It was felt then to be highly desirable that a uniform procedure for leasing oil and gas rights in all classes of lands be provided and new regulations were drafted accordingly.

Belgium Will Pay Debts

Premier Declares No Request For Cancellation Will Be Made

Brussels.—Belgium is determined to meet all its financial obligations, despite the serious situation confronting its treasury. Premier Janssens has declared that as to the possibility of a request for cancellation of its debt to the United States, he said: "Belgium has signed the Washington agreement and does not think of not keeping her engagements, however heavy may be the charges to pay the exterior debt, which necessitates payments in dollars which very seriously weigh on Belgium's treasury."

MANITOBA POOL FAVORS BUYING OF ELEVATORS

Brandon, Man.—Endorsement of the action of the board of directors in deposing the offer of the United Grain Growers' Limited, to form a company to operate United Grain Growers' and Pool elevators and a resolution of buying or leasing United Grain Grower elevators in Manitoba were features of the annual meeting of delegates to the Manitoba Wheat Elevator Association.

These resolutions, passed with only four dissentients, followed upon a resolution of the action of the board of directors in deposing the offer of the United Grain Growers' Limited, to form a company to operate United Grain Growers' and Pool elevators and a resolution of buying or leasing United Grain Grower elevators in Manitoba were features of the annual meeting of delegates to the Manitoba Wheat Elevator Association.

RIUM RUNNERS WILL BE SUBJECT TO INCOME TAX

Toronto.—A dispatch to the Globe from Windsor, Ontario, says:

"Liquor dealers who technically describe themselves as 'Exporters' were now required after they had neglected the full import of the prize commission in the new famous Crest Smith case, by terms of which Smith must pay the 15-cent government tax, \$25,000 at tax upon his profits from liquor in 1920-21."

The ruling of the highest tribunal in the empire decided a test case filed by the Canadian Government to determine whether it was legal to tax profits made from liquor sales.

"According to local barretters, who have followed closely the progress of the case through various courts, another border cities 'exporter' who is rated as worth more than an average millionaire, and whose operations were the most extensive of any along the border here, will be compelled to hand to the government approximately \$500,000 in income tax, representing profits made in 1920-21 period."

"According to a list of exporters, who are said to have made large sums, and who will be assessed by the government for a large share of the tax earnings—the names being on file in the department of finance at Ottawa pending the outcome of the Smith case, the total will be far in excess of \$1,000,000."

Dr. Michael Clark Is Dead

Well-Known Western Parliamentarian Passes Away

Calgary.—Dr. Michael Clark, parliamentarian, debater and writer, died suddenly of his heart attack at Olds after a brief illness. A few days ago he declined to speak at the Olds Liberal convention, because of ill-health, but no person thought then that his condition was so serious. His death was caused by a heart attack. He was 68 years old and had been in ill-health for some time.

Dr. Clark came to Canada in 1902. His first appearance in public was at the Alberta Liberal convention in Calgary immediately after the creation of the province. He was a member of the convention which was held in 1902.

Dr. Clark was a member of the Alberta Liberal convention in Calgary immediately after the creation of the province. He was a member of the convention which was held in 1902.

Western Farmers Should Receive Higher Prices For Wheat On The Basis Of Protein Content

The protein content of Canadian wheat averages so much above that of wheat from other countries that there should be even more price preference for the Canadian farmer than is now obtained, but it is doubtful whether such recognition will come so long as chemical analysis is not given definite weight in the established standards for wheat grading. Neither United States nor Canadian standards give a recognition to this factor, that results in increased return to the farmer producing the extra fine wheat.

Protein content of the wheat constitutes an index of the gluten content in the flour. Flour with high gluten content is more nutritious, absorbs more water, and will make more loaves of bread per barrel of flour. The United States has reached a point where bakers pay close attention to the chemical content of the wheat flour, with the result that they are willing to pay premiums for better flour. When this was first realized, millers were able to pick up old lots of good quality wheat in a particular grade without paying more than the average price for the particular grade. However, the situation is changed. A recent statement in "Wheat Studies" is to the effect that: "There are great variations in the protein content of wheats of a given grade. Consequently, because of the importance of this factor in millers' requirements, there is commonly a far greater range of prices for wheats of the same grade but of different protein content, than between grades of wheat of equal grade." To a great extent the farmer has failed to profit by this new criterion of value because wheat is sold almost entirely by standard grades. The dry land farmer who produces under conditions of high cost both because of summer-fallow and frequent loss of crops, is the farmer whose wheat would receive most recognition under this new standard. Recognition of protein content will do much to aid many of the farmers who are now marginal producers and will also raise the general level of the quality of the wheat produced. In the local market, wheat of higher protein content gives full credit for quality, benefits both the producer and consumer.

In line with the idea concerning the importance of emphasizing protein content is another suggestion pointing out the advantages of wheat yielding low grade wheats of the market and using these grades for feed purposes. Not only do low grades have a disproportionately large share of the wheat upon the market, but they also tend to injure the reputation of the region from which they are produced. The maintenance of recent standards has gone far to reward quality production, but because of the high quality of our wheat, further refinement of standards in terms of protein content will be particularly advantageous to Canada. The provinces of Saskatchewan are particularly interested in this state of the development of wheat production and marketing. It is a fact by the way, that sufficiently advanced in the Saskatchewan wheat has the highest protein content of any wheat produced in Canada, and the milling interests of the Dominion have a map showing the particular districts in this province where the high protein wheat is grown. South of the main line of the Soo Line, produces the largest quantities of this extra high-grade durum wheat. The importance of this to our farmers is not yet realized. By concentrating on quality wheat production and establishing a Saskatchewan inspection system, and placing our wheat on the world's market as Saskatchewan wheat instead of the generalization of the northern numbers, it is possible that immense benefit may accrue to our grain growers, particularly when the Hudson's Bay route is opened up.

Trade With Bermuda
Canada should hurry and get her ships operating between British West Indies and Bermuda under the new treaty. The opinion expressed by Lieut. General Sir John Asher, governor of Bermuda, while in Montreal with Lady Asher. He declared that Bermuda was anxious to develop her trade with the Dominion.

W. N. J. 1440

Tomato Growing in Saskatchewan

Method Adopted to Hasten Ripening of Fruit

Last year was very favorable in some parts of Saskatchewan for growing tomatoes. At the Scott Dominion experimental station 345 pounds were picked on the vines before the first killing frost and 97 pounds well advanced were picked green, a large quantity of which ripened with a few days. The method of growing adopted was to plant the seed in boxes in the hot bed in the middle of April and reset about three inches apart when an inch or two high. When four or five inches high the glass was gradually raised for a greater time each day. After all danger of frost was passed transplanting was done, the plants being placed four feet apart each way and deep enough so that only one-fourth of the plant was above the ground. The plants were often irrigated with water. All the laterals were kept pruned, only the main stem being allowed to grow and this was tied to a stake so that the tomato vines were not around and exposed to the sun. In the superintendent's report for 1925, which has been received from the station or from the Public Health Department of Agriculture, Ottawa, an illustration is given showing the method proposed to hasten the ripening of the fruit.

Market For Cereals

Czechoslovakian Trade Pact Would Be Aid To Canada

Should a trade agreement be reached with the Czechoslovakian Government, Canada would receive the benefit of a reduction amounting to almost 60 per cent on her exports of cereals and wheat, four to about, according to P. V. Kvelon, consul-general of the Czechoslovakia Republic in Montreal. The new tariff law passed by the Prague Government imposing duty of \$1.60 on wheat, \$1.14 on oats and \$1.50 on wheat flour per 100 kilos had been suspended until August 12. After that date the count hoped that Canada would take advantage of the "most favored nation treatment" extended by Czechoslovakia. Under such a treaty the duties would be lowered.

Immigration To Canada

Heavy Increase Is Shown In First Four Months of Performance, Year

A compilation of immigration to Canada for the first four months of the calendar year shows an increase of 81 per cent over the first four months of 1925. The actual figures are 39,412 in 1926 and 21,774 in 1925. There has been increase in every month of the year ranging from 16 per cent in January to 32 per cent in March. For the first four months in question immigration increased from 9,219 to 15,297; from the United States from 4,773 to 6,751; and from other countries from 2,473 to 19,722.

When the economical housewife casts her stare bread into the waters of the retail breadpans.

Honey From Canada

Makes Name Abroad

Holland and Germany are now our chief customers. Canadian honey is rapidly insuring itself a permanent market in Europe, especially Holland has recently become the chief purchaser of Canadian honey. The export figures for the eleven months ending February, 1926, are: Netherlands, 680,000 pounds; Germany, 455,600; United Kingdom, 217,000 pounds; United States, 55,000 pounds; Denmark, 14,000 pounds; all others, 26,000 pounds.

Ontario and Quebec have hitherto been the chief beekeeping areas of Canada, but the western provinces are rapidly developing up-to-date apiaries. The western provinces will soon be in a position to supply their own markets, and probably at a somewhat later date the Maritime provinces also, while Quebec, Ontario and British Columbia, will have sufficient surplus to justify the development of permanent markets abroad.

To Dominate Clover Seed Market

British Columbia To Undertake Extensive Cultivation of Clover

British Columbia has visions of dominating the Canadian clover seed market as a result of the reclamation project in the arid Simoes Lake. This body of water was recently drained by provincial authorities, leaving a valuable tract of land, which will be opened up by a system of roads and offered for sale. In the meantime the government has experimented in the production of clover seed on the red variety, though a recent report in the Victoria Times does not specify the particular kind.

A field of 500 acres will be harvested this fall, the yield is expected, running around eight bushels per acre. Next season 1,000 acres of government land will be ready to harvest. The provincial minister of agriculture, Hon. E. D. Harrow, confidently expects to make a profit of \$100 per acre, and to have enough clover seed next fall to supply the whole domestic market without importing.

Registered Seed

Order Placed In Saskatchewan For About Fifteen Carloads

An inquiry for a quotation of 500 tons of registered Saskatchewan Marquis wheat has been received from a British firm by the Saskatchewan Registered Seed Association. This quantity represents 15,000 bushels, or 35 carloads, and if filled will be the largest condemnation yet sent from the province. Substantial orders for registered seed wheat and other grains have been filled by the association for Argentine, United States and Canadian buyers in the last twelve months.

A Helping Hand

Irate Parent—"I'll teach 'you to make that man look any better." Young Man—"I wish you would say, 'No, I'm not making much headway."

Landing Fields In Mid-Ocean Are Proposed By Engineer For Trans-Atlantic Air Line

Swarm Detection

New and Easy Method of Locating Submarine Boats

A method of doing away with the need of going through a colony and examining every comb for them called "swarm detection" has been described by Mr. W. S. H. Blair, superintendent of the Kenilworth, N.J., Dominion experimental station, in his last report. In the two mid-airplanes consisting of sixteen columns, he says a shallow super is left on each column, the entire super is in the water and spring these serve of purpose of a food chamber and in the active season as a brood chamber. At Bridgetown, additional supers given these colonies during the season were placed over a queen-cage. Mr. Blair states that of the fourteen active winter colonies only two were lost. The colonies developed queen cells, all of which were in the shallow super.

By the method here described any queen cells that may be present can be detected by tipping one end of the shallow super and looking along the bottom bars of the shallow frames.

No Poison On Apples

Canadian Apples Not Affected By Spraying Methods

Following cables received from England of a serious poisoning from eating imported apples, Dr. Frank T. Shutt, D.S.C., Dominion chemist, reported for analysis 42 samples of unidentified sprayed apples from the chief apple exporting districts of Canada in Nova Scotia, Quebec, Ontario and British Columbia. Examination showed that approximately one-half the samples were entirely free from arsenic and the greatest amount found was slightly in excess of one-two-hundredths grain per pound.

At this rate it would require only a dozen apples of average size to supply the minimum medical dose and four dozen apples to supply the maximum dose.

Green Cabbage Worms

Poison Spray May Be Used As A Remedy

During the late summer and autumn green cabbage worms, which are the larvae of the cabbage butterfly, have been reported to be causing considerable damage to the crops. The butterfly is very common in gardens, where they can be seen depositing their eggs on the leaves of cabbages and turnips in addition to cabbages. Poison spray may be used as a remedy until the middle of the month of September. The most effective and most economical remedy is fine pyrethrum insect powder. One part of the powder should be thoroughly mixed with four parts of water. The mixture may be applied with a brush, or by means of a pump, or on a cloth held in the end of a short stick, the operator holding the bag over the plants and waving the stick with a saw held in the other hand as he walks along the rows.

Calgary Stamped a Big Success

Lower: Judging the bucking contest.

The Calgary Stampede was unique in Canada, in that it was not professional. The actual cowboys, actual chuck-wagons and work horses from the ranches in the district were the performers. In other words, this stampede is "the real thing" in a ranching territory, where every kind of thrilling sport known in the west is participated in by genuine westerners. It is described

Pleanty Of Land Available

Cheap Land With The Highest Yield Can Be Had In Western Canada

According to cable advice, the governor of the Hudson's Bay Company, speaking at the annual meeting of the company, stated that there still remained in the possession of the company 2,815,000 acres of land in the prairie provinces. He pointed out that the present price of land there was lower than that of similar land in any other part of North America despite the fact that the average tax on farm land was lower in Canada than in the United States and the average yield of spring wheat was higher. This, he said, was the great inducement for Canada held out to the immigrant farmer—the cheapest land with the highest yield on the North American continent.

Backward In That Respect

A note in China sends me an amusing yarn about Lord Willington, Lord Bynne's successor as Governor-General of Canada. Lord Bynne, who has democratic leanings, was asked seriously by an eminent Chinese diplomat why the English Government had not sent its labor directive machinery. "We are a very back-wash race in that respect," answered Lord Willington, "but then in comparison with you we are a very young race, so please don't judge us too harshly."—London, Mail.

Harriet (at telephone).—"Oh,

Charles, do come home. I've missed the plugs in some way. The radio is full with Fred who is singing the best but it's singing 'Moonlight and Flowers'."

W. N. J. 1440

WORLD HAPPENINGS
BRIEFLY TOLD

The man in Reading, England, whose radio loud speaker can be heard by his neighbor who is liable to a fine of £25.00.

Captain Postels, a Russian of 40, faces trial by a special court martial because he shipped William S. Cullerton, -American minister to Romania.

Samuel Scott, a pioneer of the west who for many years was associated with the agricultural interest of the country and was a prominent member of the Winnipeg Grain Exchange, is dead.

Ratepayers of Vancouver will vote some time next October on the proposed \$100,000 bylaw for carrying out the improved civic centre scheme. The greater part of the money will be required for expropriation of private property.

Two noted Canadians who had been already appointed jury councillors, have been sworn in at the jury court held by His Majesty. They were Hon. Francis Anglin, chief justice of Canada and Mr. Hon. George Perry Graham.

Dick Quillington, reported to be 164 years of age, and the oldest Indian in British Columbia, died suddenly at his home on the Esquimalt reserve.

Robert Alexander Baker, well-known advertising man and president of the Baker Advertising Agency, Toronto, is dead.

Twenty-nine persons are dead and four are blind from poison liquor in Buffalo and nearby towns in Ontario and Eastern Canadian cities. Thirteen of the dead are from Buffalo. Three more died at Lockport. The other thirteen died in cities on the Ontario peninsula.

An increase of \$11,142,314.09 or 25.69 per cent. in the net earnings for the first six months of 1925 as compared with the same period of last year is shown in the financial statement of the Canadian National railway for the period January 1 to June 30, 1925.

Recent dismissal of colored voters from the Canadian National Party are doing our service as the subject of a protest at a meeting held in Toronto under the joint auspices of the United Negro Improvement Association and the Canadian League for the Advancement of Colored People.

60,000 Harvesters Wanted

Army of Harvesters Required to Gather the Crop on Prairies

It is estimated that about 60,000 extra men will be required to gather the harvest in Western Canada this summer. This army of harvesters will be drawn from the provinces of Eastern Canada, British Columbia and the United States. It is understood that Saskatchewan will require 25,000 men; Manitoba, between 8,000 and 9,000 and Alberta about 12,000.

From points both east and west beyond the three prairie provinces of Manitoba, Saskatchewan and Alberta, specially low railway rates will be available to certain central points in the United States. It is understood that Saskatchewan will require 25,000 men; Manitoba, between 8,000 and 9,000 and Alberta about 12,000.

Was Original Peter Pan

The Boy Who Never Grew Up Now Best Man at Wedding

"Peter Pan," the boy who never grew up, played quite a grown-up part in the world recently.

Peter Llewellyn Davis, the original of Sir James Barrie's Peter, acted as best man at his brother's wedding in Kent, England. Sir James also attended the ceremony.

"Peter Pan's" brother is Nicholas Llewellyn Davies. He was married to the Honorable Mary James, daughter of Lady Northcliffe. He is one of Sir James' wards.

The big Medicine Hat plant of the Canadian Western Steel Corporation, which has been idle for some years, has been purchased by the United States Harvester Manufacturing Company of Erie, Pennsylvania. The latter is also negotiating for the purchase of Redcliffe Rolling Mills, the equipment of which would be moved to Medicine Hat to enlarge the local plant for iron-rolling process.

Many Hospital Beds

A hospital census of Canada reveals the fact that there are 28,676 hospital beds in the Dominion. Of this total 5,679 beds are available for maternity patients. The census also shows that there were 36,654 births in hospital in Canada in 1925.

The man who poses as a lion in society is usually a bear at home.

Gandhi Would Reform India

Tells What Measures He Would Take

"If I were Emperor of India," Mahatma Gandhi, the great Indian Nationalist leader, said, "I would prohibit the importation of intoxicating liquors and close down every distillery; I would summon the representatives of both Hindus and Muslims, search their pockets and deprive them of all estates and weapons, and then lock them together in one room and open it only after they had settled their quarrels."

"I would intend the hand of fellowship to the whole world, irrespective of caste, color or creed; I would disband the entire army of occupation in India, retaining only enough police to protect the citizens; I would guarantee full protection to every European as well as all honest European enterprises; I would guarantee protection to all forms of religious worship, except that which is repugnant to the moral sense of mankind; I would not bribe the frontier tribes as they are now being bribed, but I would cultivate their friendship, and I would impose a prohibitive tariff on all foreign cloth."

Hearts Of Oak

British People Never Shook Higher In Respect and Confidence of the World

The British as a political people never yet stood higher in the respect and confidence of the world. If they were not steady as a rock through the thousand troubles crowding upon them in home and foreign and imperial affairs, there would be no hope of stability to Europe, and none of avoiding anarchy in the world. The British are the keystone of a ponderous arch, and if we fell the whole world structure of the world would crash. In the eighth year of the American war, still holding firm, despite anxieties, disappointments, crises, and even coming one at a time, but after beating us on all sides, the British in a way that might have worn out the heart and fibre of a less solid breed—J. L. Garvin, in London Observer.

Manitoba Dairy Industry

Growth in Recent Years Has Been Phenomenal

The growth of the dairy industry in Manitoba was recently summed up by A. L. Gibson, dairy commissioner for the province. In 1925, according to his statement, between 60 and 69 carloads of butter were shipped into Manitoba from Ontario and Quebec. In 1913 imports were 35 carloads and in 1914, 30 carloads. In 1915 Manitoba produced enough butter to meet market requirements and also shipped out of the province 50 carloads. This has been increasing each year until in 1925 the dairy industry of the province exported 35 carloads valued at 2,500,000.

Activity in Building

Encouraging State of Conditions in Canada Generally

Building business is more active in Winnipeg than it is at present. For the first six months of this year the total value of the building permits was \$2,300,000 compared with \$2,125,000 for the similar period in 1925.

This activity in building in Winnipeg and also in many other places throughout Canada is indicative of the encouraging state of conditions generally in the Dominion. With the prospects for another good grain harvest this year, farmers and business men in Canada are feeling optimistic.

Women Enter Legal Profession

Six more women have been called to the bar in London, indicating that an increasing number of them are taking up the legal profession as a means of livelihood. Among the latest to do so are Miss Margaret H. English and Miss H. H. Buckley. They are the first of the English bar of Lord Wrenbury, a lord of the appeal, and Miss Heng Hong Lim, of Penang, Straits Settlements. Miss Heng is the second Oriental woman to be called to the bar. Her brother, Kwei Heng Lim, also has been admitted to the practice.

British Use Dollar Sign

Designations of goods have appeared for the first time in the shopping districts of London frequented by American tourists. The marks, quite evidently, are London made, as they are very much of the perpendicular variety, and lack the original Yankee twist.

Caracal lambs are killed when they are only a few days old, before the cost of their fur becomes too high to reduce Persian lamb and Astrakhan furs.

Pullman porters measure time the same way that amateur anglers fish—from tip to tip.

A Sports Frock of Practical Design

Fashion tells us the sports frock have assumed a predominant place in the wardrobe, their simple and practical lines fitting in perfectly with the requirements of our active, every-day life. The discriminating woman might well choose the two-piece model pictured here for its simple becoming lines. The blouse slips on over the head, and has a plain collar to be worn high or low. There are a few buttons at each side over the hips, and the long set-in sleeves are finished with gathered cuffs. A tie, the polka-dot pattern, is worn under the collar, the ends being tucked through two buttonholes. The bodice top skirt has a chain of buttons in the center front, the back being plain. The blouse No. 1038 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 2 1/2 yards 27-inch bordered material as illustrated. The skirt No. 1194 is in sizes 26, 28, 30, 32 and 34 inches waist. Size 28 waist requires 2 1/2 yards 27-inch bordered material to match blouse, with 3/4 yard lining for bodice top. Price 20 cents each pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Telephones in Canada

New Takes Second Place Among Countries of the World

According to recent statistics Canada, with 11.6 telephones to every hundred of her population takes second place among the countries of the world in the United States there are 14.2 telephones to every hundred people. New Zealand comes Denmark, 9; New Zealand, 8.1; Sweden, 6.3; Norway, 6.1. In Great Britain there are only 2.8 phones to each hundred of the population and in France 1.7.

Lincoln's Son Is Dead

Robert T. Lincoln, only surviving son of President Abraham Lincoln, was found dead in bed at his summer home in Vermont. Mr. Lincoln, who had served as secretary of war, minister to Great Britain and for years president of the Pullman Company, was 82 years old.

Recruited After Twenty-One Years

A most interesting reunion took place on the Cunard liner Ascania, docked at Quebec last week, when Mr. Harold Taylor, well-known buyer for the C.N.R. in Winnipeg came aboard and met his mother, who was one of the passengers. Mr. Taylor had not seen her for 21 years. In the picture above Mr. Taylor is shown on the left, while on the mother's left is his grandson, whom she had never seen.

Survey Of Unoccupied Land

Manitoba Government Taking Agricultural Survey of the Province

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province, which when completed will provide the incoming settler with all available information on such lands. A total of 2,474 homesteads have been taken up in Western Canada this year. In addition 827 families consisting of 3,122 persons have come to the western provinces under the government settlement scheme. The Canada Colonization Association has placed 645 families on 150,552 acres of land in the past year. All post-war immigration records were broken recently when 1,681 immigrants passed through Winnipeg in forty-eight hours.

To Manufacture Automobiles

Engineering Firms in Australia Endeavor to Establish Industry

Four large engineering and electrical engineering manufacturing firms in New South Wales are planning to form a company capitalized at £1,000,000, to produce Australian-made motor cars. They intend to build a motor car of the type car suited for Australian conditions, and apply in its manufacture the mass production system. Representatives of these firms have approached the Australian Government with the suggestion of a subsidy to aid the new industry. The minister of trade and customs promised that any reasonable recommendations would be sympathetically considered by the cabinet. Australia is the largest importer of U. S. automobiles.

Frenchman Invents Bicycle That Flies

Machine Can Be Transformed Into a Small Monoplane

A young French mechanic in a factory at Dijon has just invented a bicycle that flies.

According to a report received in Paris the Frenchman has been working on his invention several years and has finally completed successful tests. The bicycle can immediately be transformed into a small monoplane and fly to a height of 150 feet. Trials were conducted without mishap and the mechanic intends to present his invention to the public.

The successful manufacture of the bicycle in large quantities will make flying within the means of all, in the opinion of the inventor.

Rare Paintings Stolen

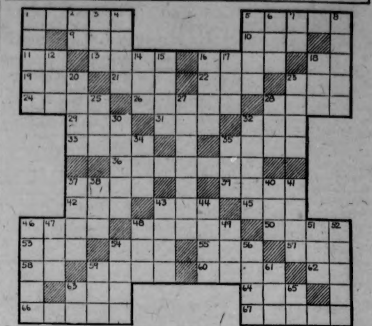

Merchant Plunders Caches in France By Ingenious Method

Valuable old masters for painting American collectors of rare paintings found their way into the Paris anti-gully market by a trick which has placed the dealer behind the bars. The French merchant, who is a highly specialized antiquity dealer and an artist of some ability made copies of the paintings in private galleries. After carrying "antique" the copy, he calmly carried away the original work of art and left his substitute hanging in its place. His never work in the Paris market and was careful to select distant castles in the country where experts would not be likely to pass.

Celebrated Russian Church in Danger

The cathedral of St. Isaac, the largest and finest church in Russia, has developed serious fissures in the granite masonry columns. Built upon submerged wooden piles, as are most of the buildings in Leningrad, the magnificent edifice, which cost \$15,000,000 to build, has been steadily subsiding. Great perpendicular cracks have appeared in one column facing Alexander Park, and the portico, which it supports, is threatened with collapse.

SUNDAY SCHOOL LESSON

AUGUST 8

THE GIVING OF THE MANNA

Golden Text: Jesus said unto them, I am the bread of life. John 6:25.

Lesson: Exodus 16:1-26.

Devotional Reading: John 6:24-40.

Explanations and Comments

1. The People Complain of Lack of Food, verses 1-3.—This is the third record of "murmuring," the Hebrew word for "complaining." "Would these had died by the hand of Jehovah in the land of Egypt," the people cried, "when we sat by the flesh-pots, when we dined in the fat of the land?" They remember the flesh-pots, but not the affliction. Human nature does not change. Murmurers still have short memories. The spectacles of our most magnificently planned and bestowal sufferings.

The Israelites even accused Moses of having brought them forth into the wilderness to kill them all with hunger. "It is the worst of unthankfulness that to be so unworthy of liberty towards their deliverers" (Millon).

2. Food Is Provided, verses 4-15.—And Jehovah spoke unto Moses, saying, I will send the ravens to thee, saying, At even ye shall eat flesh: and in the morning ye shall fill with bread; and ye shall know that I am Jehovah, your God.—you shall know it by the manifestation of my power and care. Here in the early part of the wilderness the complaints of the people are treated with mildness, as if made by irresponsible children; but toward the end of their journeyings such complaints are severely punished, for after so many years' experience of God's providence, something better was expected from them.

Auxiliary Links

Artificial Lungs Provide Air Pressure With Oxygen For High Altitudes. Auxiliary lungs which will allow man to reach unprecedented heights, are said to have been perfected by a French chemist, M. Mareaux. The Academy of Science regards the invention as one of the most important in recent years. Artificial lungs, adjusted to a standard, provide pilots with increasing amount of oxygen as the plane climbs. Experiments have shown that a pilot can stand minimum air pressure of 100 millibars, as compared with 760 millibars at sea level, without responding to a climb of 50,000 feet, hitherto unattainable by man.

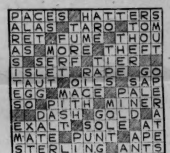

Potatoes For California

Arrangements for the export of large quantities of British Columbia seed potatoes to California are being made this year by a potato grower of that state. The British Columbia potatoes are desired in California for seed purposes, as the growers there introduced new strains into the southern area. Experiments were made with Canadian seed last year in California, and growers were well satisfied with the results.

Haitian Cattle For Japan

Twenty-two pure-bred Holstein cattle collected in various parts of British Columbia have left Victoria for Japan, consigned to breeders' associations in five different parts of that country.

Answer to Last Week's Puzzle

Building Bigger Airships

Gigantic Airship Hangar at Cardington Has To Be Enlarged. British airships of the future are to be so much bigger than was thought some months ago that the gigantic airship hangar at Cardington has had to be reconstructed. It was originally planned for 700 feet long and 144 feet high and capable of housing two airships of the R-23 class, but now measures 812 feet long and 150 feet high, says the Modern Transport, and will house one airship of the R-101 class. A mooring mast has been erected with a pump capable of lifting 5,000 gallons of fuel oil an hour to airships.

Growth Of Saskatchewan

435,530,000 Bushels of Grain Produced in Province Last Year. When Saskatchewan became a province, twenty-one years ago, there were almost 60,000 farms with a little over 2,000,000 acres in crop, according to the provincial minister of agriculture. In 1925 the yield of grain was under 60,000,000 bushels, while in 1923 it was 435,530,000 bushels. The total wheat production increased from 34,742,000 to 240,551,000, and was 57 per cent. of the wheat grown in the Dominion in 1925, as compared with 31 per cent. grown in 1925.

Saving Money

Conditions are generally good in Alberta for as much money has been invested in Alberta Government savings certificates up to the end of June this year as for the whole of 1925. The figures for last year, covering the entire twelve months, were \$2,149,516, and to the end of June this year, \$2,100,756 had been accounted for. Since July came in, the sales of certificates have brought the total for the year thus far well up to the level of the full year preceding, with five months' business still to come in.

Special ≡ AUGUST ≡ Offer

To each subscriber who renews his subscription to the Oyen News, during the present month, we will give absolutely free, 1 yard stick, one pad of white bond writing paper and one packet of envelopes. (Subscribers who are in arrears must bring their subscription up to June 1927 to participate in this offer).

THE OYEN NEWS

Fine New C.P.R. Pier for Vancouver

Growth of the port of Vancouver to proportions that put it on a level with the major harbors of the world is indicated by the opening in August and September of the new Canadian Pacific Railway pier. The pier sheds are 160 feet wide and lie on either side of a central depressed track area containing four tracks. A two-story headhouse the full width of the pier is located at the shore end and this provides storage space and driveways into the sheds while the upper floor has passenger handling facilities, baggage room and office and store rooms for the company's steamer service.

Two railway tracks and one travelling gantry crane will run along the deck outside of the shed. On each side of the pier. Four depressed tracks will be located in the fill in the centre of the pier for the handling of freight to and from the sheds. Continuing sliding doors will be installed on both sides of the pier so that freight may be taken directly through the sheds from ships' slings to cars. The columns supporting the roof on the inboard side of the shed have been set back 12 feet from the line of the pier to avoid the necessity of closely spotting cars. Eight marine elevators will be installed on the pier—three on each side and two on the inboard end. These elevators will be of what is known as the Pacific Coast or the "Barlow" type, being so constructed that when the elevator is lowered an apron will project out into the sideport of a ship lying alongside, thus enabling freight to be moved directly from the ship to the dock by means of trucks. Most of the coastwise boats load and unload from their side ports, while the ocean going steamers of the Canadian Pacific Railway Company, with the exception of the "Empress of Australia," use side ports for the loading and unloading of bulk and baggage. The deck above these Barlow elevators will be constructed of a steel bridge, which will carry two railway tracks and one crane rail. Mechanism will be provided so that these bridges may be hoisted vertically a distance of 15 feet thus clearing the elevator shafts for the operation of the elevator.

Two trolley baggage elevators connecting the main deck with the baggage room on the upper deck of the headhouse will be installed. On the inboard there will also be installed one twenty-ton team elevator with a platform approximately 12 by 35 feet.

About Town and Country

The directors of Oyen Agricultural Society desire to acknowledge with thanks, a donation from the Oyen Hardware Co., which was omitted in error from the prize list.

Mrs. John Naismith and daughter Margaret, left yesterday for Crasnayga, where Mrs. Naismith is grain buyer for the Home Grain Co.

Joe Quinn, formerly of Armley, Sask., who has been visiting in Minneapolis, arrived in Oyen yesterday and is spending a few days in the district.

DON'T READ THIS, unless you are interested in Binder Twine. We have a car on track and our prices are right. United Grain Growers, Ltd.

Mr. J.S. Thomson a former citizen of Oyen, and family, who have been visiting friends and relatives here, left last Sunday on their return journey to Wetaskiwin, Alta.

Mr. Arch'd Johnston who has been away on a business trip to Bassano and Calgary, and afterward spent a few days in Banff, returned to Oyen yesterday.

Mrs. H. J. Cooper and son Joseph, of Calgary, are spending a holiday in town, having arrived from Calgary last Monday.

Mrs. C. P. Snyder, who has been spending a vacation visiting friends in Edmonton, returned to Oyen last Saturday. To "Jackie's" keen delight his mother brought him a fine St. Bernard puppy.

Mr. and Mrs. Robert McLaren and daughter Joyce, Miss Nellie Sharp and Miss Josephine Love, returned to Oyen last Saturday after spending a two week's holiday at Buffalo Lake. Mr. and Mrs. Cunningham of Youngstown and Mr. and Mrs. W. Frizzell and Albert Stewart of Sibbald, who were members of the same party, also returned Saturday.

Miss Louise Charbonneau, arrived in Oyen from Calgary last Sunday and left by car for Monitor to visit at her home.

Shower for Miss Ruth Walker

Mrs. M. G. Whitlock was hostess at a shower for Miss Ruth Walker on Monday evening when about 20 guests were present. Previous to the serving of dainty refreshments, the guests were entertained at whist, Mrs. W. D. McPhail being the prize winner. Following the refreshments, young George Whitlock and little Violet Love, dressed as bride and groom, appeared to the strains of the wedding march, and presented the bride elect with the gifts of the guests. The function proved a most enjoyable affair, and Miss Walker was the recipient of many useful articles.

M. D. of Bertawan

Minutes of Council meeting held at Sibbald, on Saturday July 3, 1926.
Present: Reeve Wilson, Councilors Allwood, Jones, Mowers and Norris.

Minutes of meeting of June 5th approved on motion of Councilor Jones.

Allwood: That the matter of passing a by-law to tax Pedlars be tabled until next meeting and that in the meantime the Secretary write to the Attorney General for information as to the legal definition of a pedlar.

Norris: That a lease of the S.E. of 12 2nd West of 4, be given to Ed. Herbert, with the option to purchase, option to expire on December 15, if not taken up by that date.

Norris: That the Secretary draft a by-law making it illegal for the owners of chickens to allow their chickens to run at large in the Hamlets of the municipality.

Mowers: That License fees on Pool Tables and in the local Pool Hall be reduced from \$30.00 to \$10.00.

An interview was had with the Provincial Road Engineer, which resulted in several misunderstandings between council and the engineer being straightened out.

The following accounts were passed on motion of Norris: G. H. Loughhead, 30.00; Frank Peters, 76.00; Jas. Lees, 147.00; Wm. Jardine, 6.00; Oyen News, 2.50; Richardson Machinery Co. 72.00; Alaska Hardware, 5.25; M. Popovich, 10.00; Paysheets, Div. 1, 200.00; Div. 5, 461.60; Div. 4, 80.00; Alexander McGregor, 5.00.

The matter of fixing up the Cemetery Grounds was left with Councilor Allwood, with authority to get whatever work that was necessary done to the grounds.

Meeting adjourned on motion of Mrs. Wilson.
William Linklater Sec-Treas.
